

2nd NATIONAL MEETING ON MEDICAL PHYSICS
For the Advancement of Medical Physics
November 7 and 8, 2014

On 7 and 8 November 2014, was held in Bogotá, Colombia, the 2nd National Meeting on Medical Physics to commemorate the International Day of Medical Physics, which was attended by about 100 participants.

This successful meeting was organized by the Colombian Association of Medical Physics and Radiation Protection - ACOFIMPRO, and was backed by the Universidad Nacional de Colombia (Bogotá) and the Pontificia Universidad Javeriana. The event also received the endorsement from the Latin American Association of Medical Physics - ALFIM, and the American Association of Physics in Medicine - AAPM. In addition, we had speakers from the Spanish Society of Medical Physics - SEFM, the Universidad Pedagógica y Tecnológica de Colombia - UPTC, and the Universidad Nacional de Colombia (Medellín).

We were fortunate in having the participation of President of ALFIM Simone Kodlulovich, AAPM Liaison to Colombia Raul Gonzales, as well as several national and international speakers, who addressed a variety of topics from quality assurance in radiotherapy, diagnostic radiology and nuclear medicine, up to the certification process for Medical Physicists in Latin America.

One of the most relevant activities in the 2nd National Meeting on Medical Physics was the forum: What's the future of Medical Physics in Colombia? This forum allowed sitting at the same table renowned pioneers of Medical Physics in Colombia.

In the following link it is possible to download the schedule carried out at the event, as well as files with the slides presented
