

International Day of Medical Physics

University of Malaya / University Malaya Medical Centre

The 2018 International Day of Medical Physics (IDMP) was held on November 7. The theme for this year was regarding how Medical Physicists benefit patients on a daily basis.

For this year, the Medical Physics team in the University of Malaya and the University Malaya Medical Centre, opted to hold a poster and video exhibition in the concourse lobby of the hospital building. The target audience was passer-by patients and hospital staff, though the exhibition was also publicized over social media.

Educational posters were prepared by the academic and clinical staff, as well as the Medical Physics students. The topics covered all three facets of Medical Physics (Imaging, Nuclear Medicine, Radiotherapy), from radiation safety to imaging physics. The academic staff and students also made a series of 3-minute videos introducing various Medical Physics related research projects carried out in the university.

Special publicity was reserved for highlighting the 18th Asia-Oceania Congress of Medical Physics (AOCMP) / 16th South-East Asia Congress of Medical Physics (SEACOMP), which was to be held in Kuala Lumpur from 11 to 14 November, a mere 4 days after the IDMP celebrations.
