

WOMEN: MARVEL CREATURES OR MARVEL SCIENTISTS?

Madame Marie Curie famously snagged two Nobel **Prizes** — for Physics in 1903 with husband Pierre and Henri Becquerel, and again in 1911 for Chemistry after discovering radium and polonium

Rosalyn S. Yalow, a medical physicist who persisted in entering a field largely reserved for men to become only the second woman to earn a **Nobel Prize** (1977) in Medicine, died on Monday in the Bronx, where she had lived most of her life. She was 89.

The IOMP Women Group's objective is in compliance with the main IOMP mission and directives to advance medical physics practice worldwide by disseminating scientific and technical information, fostering the educational and professional development of medical physicists, and promoting the highest quality medical services for patients.

IOMP Women Group main functions:

- Develop, implement and coordinate tasks and projects related to the role of females in medical physics scientific, educational and practical aspects.
- To disseminate the experiences, good practice and learning within IOMP NMOs and other relevant accessible areas/across the globe.
- Popularize the role of the women in medical physics and encourage female medical physicist to advance in the profession.
- Organize international cooperation in medical physics and related specialities.
- Provide regular status/progress updates to the IOMP on all tasks and projects related to the IOMP Women Group.
