Dear Sir,

The International Organization for Medical Physics (IOMP) is an internationally acclaimed professional body that is dedicated to the advancement of medical physics practice worldwide by disseminating scientific and technical information, fostering the educational and professional development of medical physics and the promotion of the highest quality medical services for patients.

I am the chair of Medical Physics World Board and the Editor of 'electronic Medical Physics World' (eMPW) - the official bulleting of IOMP, produced annually in July and December, and circulated to over 80 IOMP National Member Organisations, 15 other non-member countries over 18,000 medical physicists. I would like to underline the fact that this bulletin is also sent to various leading international bodies such as the World Health Organization, the European Commission and the International Atomic Energy Agency.

The layout of eMPW has been updated to make it more appealing and I am attaching a copy of the new version of the bulletin for your information and hope you find it interesting. Although principally distributed electronically we also print copies for distribution at major conferences and other relevant events in order to raise its profile and impact. Our next issue is due for distribution at the annual meeting of AAPM, at the European Congress of Medical Physics in Athens, at the Medical Physics College held at the UNESCO ICTP centre in Italy, during the IDMP (International Day of Medical Physics), at RSNA and at the International Conference on Medical Physics in Bangkok.

We are soliciting advertisements for our coming issues and we would like your company to consider placing an advertisement in this key publication. Please find attached our media pack, which provides further details to facilitate your decision.

Yours sincerely,  
Dr Magdalena Stoeva  
Chair of the eMPW Board
