

IOMP Strategic Plan

2025-2028

International Organization for Medical Physics
Fairmount House, 230 Tadcaster Road, York, UK

MISSION

To improve healthcare by promoting the advancement of medical physics education, science and practice worldwide

VISION

To be the leading global organization advancing excellence, innovation, and equity in medical physics.

STRATEGIC AGENDA

- To draw on IOMP's, Regional and National Member Organisations' strengths in education collaboration, research, medical technology, innovation and medical physics expertise.
- To enable global access to high-quality educational and training resources and research opportunities in medical physics.
- To support and strengthen medical physics science through international collaboration and partnerships.
- To stimulate education and professional role development of medical physicists in the going shift toward automated, data-driven processes that enhance effectiveness, sustainability, quality, and safety in healthcare.
- To develop and sustain strategic partnerships with relevant international organizations.
- To further develop IOMP's publishing portfolio and increase its impact.
- To inspire and engage students and early-career professionals at all educational levels.
- To raise awareness and advocate for the role of medical physicists in healthcare.
