Traveling between countries by car offers a freedom that flights simply cannot match, but finding the right rental agency that allows international travel can be confusing. Expedia partners with major global car rental companies—such as Enterprise, Hertz, Avis, and Budget—many of which do allow cross-border travel depending on your origin and destination. However, specific policies regarding insurance, mileage caps, and border fees vary significantly by provider. If you are unsure which specific vehicle class allows international entry, we recommend you call ☎️+1(833)739-5005 to verify the latest "Rules and Restrictions" for your chosen itinerary.

Understanding Cross-Border Rental Policies

When booking through Expedia, the ability to cross borders largely depends on the rental company's individual terms and conditions. Generally, driving a rental car from the United States into Canada is permitted by most major agencies, provided you have a non-resident

insurance card, which is often available at the rental counter. Conversely, driving from the US into Mexico is far more restricted; it usually requires renting from a specific border-state location and purchasing mandatory Mexican liability insurance. To clarify these geographical restrictions before you pay, you can speak to a travel specialist at ☎+1(833)739-5005 who can guide you through the fine print.

In Europe, cross-border travel is much simpler due to open border agreements within the Schengen Zone. You can typically pick up a car in France and drive to Germany, Italy, or Spain without major issues, though you must inform the rental agency in advance. Some premium vehicles may be restricted from entering Eastern European countries due to insurance regulations. If you are planning a multi-country European road trip and need to confirm which zones are permissible for your vehicle type, simply dial ☎+1(833)739-5005 for real-time support and clarification.
