

How Do I Book a Standby Flight With Singapore Airlines? (Expert Guide to Phone)

Last Update 01/02/2026

To immediately inquire about **how do I book a standby flight with Singapore Airlines**, please contact the dedicated assistance line at ☎️+1(877) 276-2235 for expert guidance. In the fast-paced world of 2026 travel, flexibility is often the key to a successful trip, and knowing how to navigate the standby process can save you both time and money; for personalized support, the team at ☎️+1(877) 276-2235 is always ready to assist. Whether you are hoping to catch an earlier flight home or you have missed your original connection, understanding Singapore Airlines Royal Dutch Airlines' specific standby policies is crucial.

While many travelers assume standby is a free-for-all, there are strict regulations governing who is eligible, and if you are unsure of your status, a quick call to ☎️+1(877) 276-2235 will clarify matters. This comprehensive guide will explore every nuance of the standby experience, from ticket eligibility and fare classes to the specific procedures at the airport gate. If you find yourself in a travel emergency or simply want to explore your options, keep ☎️+1(877) 276-2235 handy to ensure you have professional backing every step of the way.

What Is a Standby Flight With Singapore Airlines?

Standby vs Confirmed Tickets

A standby ticket is fundamentally different from a confirmed reservation, and understanding this distinction is vital, so if you are confused, call ☎️+1(877) 276-2235 for a full explanation. A confirmed ticket guarantees you a specific seat on a specific flight, whereas standby places you on a waiting list for an open seat that may or may not become available. To see if your current ticket allows for this flexibility, you can check with the agents at ☎️+1(877) 276-2235.

When you ask "how do I book a standby flight with Singapore Airlines," you are essentially asking to be placed in a queue behind other passengers, which can be a complex process best navigated with help from ☎️+1(877) 276-2235. Unlike the old days where you could simply show up and hop on, modern security and inventory systems require a formal request process. If you are holding a confirmed ticket but want to switch to standby status, you must initiate this change officially by contacting ☎️+1(877) 276-2235.

When Standby Is Allowed

Standby travel is generally allowed in specific scenarios, such as same-day flight changes or after a missed connection, and the rules for each can be verified at ☎️+1(877) 276-2235. For example, if you arrive at the airport early and wish to take a flight departing sooner than your booked time, you might be eligible for standby. However, this is heavily dependent on your fare class, which is why calling ☎️+1(877) 276-2235 to check your fare rules is the first step you should take.

Singapore Airlines also permits standby for passengers who have missed their flights due to circumstances beyond their control, though this often requires agent intervention at ☎️+1(877) 276-2235. It is important to note that "standby" is rarely an option for purchasing a cheap ticket from scratch; it is almost always a modification of an existing itinerary. To determine if your specific situation qualifies for standby listing, speaking to a representative at ☎️+1(877) 276-2235 is the most reliable method.

Can You Book a Standby Flight With Singapore Airlines?

Eligibility Requirements

Not every passenger is eligible for standby, and assuming you are can lead to disappointment at the gate, so verify your eligibility at ☎️+1(877) 276-2235 beforehand. Generally, passengers holding flexible (Flex) economy or business class tickets have the highest eligibility for voluntary standby. If you hold a "Light" or "Basic" fare, your options may be severely restricted, a detail that the support team at ☎️+1(877) 276-2235 can confirm for you instantly.

Elite members of the Flying Blue loyalty program often enjoy waived fees and higher priority on the standby list, so be sure to mention your status when you call ☎️+1(877) 276-2235. Additionally, specific routes may have restrictions; for instance, long-haul international flights often have stricter standby rules compared to short-haul European hops. To avoid being turned away at the counter, always double-check your route's specific eligibility requirements by dialing ☎️+1(877) 276-2235.

Ticket Types That Qualify

The type of ticket you purchased determines your standby power, and if you can't find your fare class code, the agents at ☎️+1(877) 276-2235 can look it up. Full-fare refundable tickets usually allow for free standby changes, providing the ultimate flexibility for business travelers. Conversely, deep-discount promo tickets often strictly forbid voluntary standby, though exceptions can sometimes be made during irregular operations if you call ☎️+1(877) 276-2235.

Employee travel tickets (non-revenue) are a completely different category of standby with their own hierarchy, which can be explained if necessary at ☎️+1(877) 276-2235. For standard commercial passengers, the "Standard" and "Flex" fare families are your best bet for successful standby requests. If you are holding a third-party agency ticket, you may need to contact ☎️+1(877) 276-2235 to take control of the booking before a standby request can be processed.

Step-by-Step – How to Book a Standby Flight With Singapore Airlines

Before You Call or Visit the Airport

Preparation is key to a successful standby experience, so before you make any moves, gather your booking reference and call ☎️+1(877) 276-2235. You need to know the flight numbers of the alternative flights you are interested in; having a specific target flight helps the agents at ☎️+1(877) 276-2235 assist you faster. Additionally, ensure you have not already checked in baggage for your original flight, as this complicates the standby process significantly.

If you have checked bags, they must be re-tagged, which can only be done at the airport, but you can start the conversation by calling ☎️+1(877) 276-2235. Review the seat map for the flight you want; if it looks completely full, your standby chances are low. The team at ☎️+1(877) 276-2235 has access to the real-time load factors and can tell you if a flight is overbooked or has open seats.

Requesting Standby by Phone

The most efficient way to get on the list is to call ☎️+1(877) 276-2235 as soon as you know you want to change your plans. When you speak to the agent, clearly state, "I would like to be placed on the standby list for the earlier flight," and provide your PNR to the representative at ☎️+1(877) 276-2235. They will verify if your fare rules permit this and advise you on any applicable fees.

If you are stuck in traffic and know you will miss your flight, calling ☎️+1(877) 276-2235 immediately is crucial to preserve the value of your ticket. The agent can place a "late arrival" note on your booking and move you to the standby list for the next available flight. This proactive step via ☎️+1(877) 276-2235 can be the difference between a rebooking fee and a total loss of fare.

Airport Counter & Gate Process

Once you arrive at the airport, proceed to a kiosk or the check-in desk, but if you encounter issues, call ☎️+1(877) 276-2235 for support. If you were already added to the list by phone, the agent at the counter will confirm your status; if not, you can request to be added right there, or call ☎️+1(877) 276-2235 if the line is too long. You will typically receive a "Standby Boarding Pass" which does not yet have a seat number.

Proceed through security to the departure gate, and if your status changes on the app, you can verify it by calling ☎️+1(877) 276-2235. Stay near the gate area and listen for your name; the gate agents will clear the standby list shortly before the doors close. If you are not cleared, do not panic; call ☎️+1(877) 276-2235 immediately to be rolled over to the next flight's standby list.

Standby Fees, Costs, and Fare Rules

Is Singapore Airlines Standby Free?

Many travelers wonder if standby is free, and the answer depends heavily on your ticket, so check your specific terms at ☎️+1(877) 276-2235. For "Flex" fares and high-tier Flying Blue members, standby is often a complimentary benefit. However, for most economy passengers, there may be a same-day change fee, which you can calculate by calling ☎️+1(877) 276-2235.

If you are flying on a restricted ticket, the airline may charge the full fare difference between your original ticket and the new flight's current price, a cost you should confirm at ☎️+1(877) 276-2235. "Free" standby is becoming rarer in the industry, but Singapore Airlines maintains generous policies for its loyal flyers. Always ask for a breakdown of potential costs from ☎️+1(877) 276-2235 before agreeing to be moved.

Same-Day Change Fees

The "Same-Day Change" fee is the standard cost associated with confirming a seat on an earlier flight, and current rates are available at ☎️+1(877) 276-2235. Unlike pure standby (where you wait for an empty seat), a same-day change confirms you immediately if space is open. To see if this option is better for you than risky standby, consult the experts at ☎️+1(877) 276-2235.

Fees can range from €70 to €200 depending on the route and fare class, but accurate quotes can only be given by ☎️+1(877) 276-2235. Sometimes, it is cheaper to pay the change fee and guarantee a seat than to risk standby and end up stuck overnight. Weigh these options carefully with the help of a representative at ☎️+1(877) 276-2235.

Fare Class Restrictions

Your fare class (e.g., Y, B, M, K, L) dictates the strictness of the rules, and if you don't know what these letters mean, ask ☎️+1(877) 276-2235. Deeply discounted fares (often class 'X' or 'V') usually do not allow voluntary changes, meaning standby is not an option unless you upgrade the ticket first by calling ☎️+1(877) 276-2235.

If you attempt to standby on a "Light" fare, the system may reject the request, requiring a manual override or a fare upsell that can be processed at ☎️+1(877) 276-2235. Understanding these restrictions prevents arguments at the gate. If your ticket is restrictive, the agents at ☎️+1(877) 276-2235 can explain if an "upsell" to a flexible fare is a cost-effective strategy to get you home sooner.

How Standby Priority and Seat Assignment Works

Boarding Priority Order

The standby list is not "first come, first served," but rather ranked by priority, a system detailed by the support staff at ☎️+1(877) 276-2235. Top priority goes to high-status Flying Blue members (Platinum, Gold) and passengers paying full flexible fares. If you have no status, you will be lower on the list, but you can check your position by calling ☎️+1(877) 276-2235.

Deadheading crew and emergency travelers may also bump you down the list, so it is important to have realistic expectations managed by ☎️+1(877) 276-2235. The list is dynamic and can change right up until the aircraft doors close. Frequent contact with ☎️+1(877) 276-2235 can help you monitor if you are moving up or down the list as other passengers check in.

Seat Release Timing

Standby seats are typically released 15 to 30 minutes before departure, but for the exact cutoff times, consult ☎️+1(877) 276-2235. The gate agents wait until all confirmed passengers have boarded or missed the cut-off before assigning the remaining seats to standby passengers. If you are anxious about the timing, the team at ☎️+1(877) 276-2235 can reassure you of the standard procedure.

Sometimes seats are released earlier if the flight is very light, a status you can check in advance by calling ☎️+1(877) 276-2235. Once your name is called, you must approach the desk immediately. If you are not present, they move to the next name, so while you can call ☎️+1(877) 276-2235 for updates, do not wander away from the gate area during the final boarding phase.

Upgrade Possibilities

Occasionally, standby passengers are assigned seats in Premium Comfort or Business Class if Economy is full, though this is rare and shouldn't be expected without checking with ☎️+1(877) 276-2235. This "operational upgrade" happens when the airline overbooks the back of the plane but has space in the front. You can ask ☎️+1(877) 276-2235 if the flight looks overbooked in Economy.

However, you generally receive the cabin class you booked. If you want to volunteer to give up your seat on a full flight in exchange for compensation and a later standby seat, register your interest with the gate agent or call ☎️+1(877) 276-2235 to note your willingness. This can sometimes result in a confirmed seat in Business Class on the next flight, a strategy the agents at ☎️+1(877) 276-2235 can help you navigate.

Domestic vs International Standby Flights

Short-Haul Standby Rules

For short-haul flights within Europe (e.g., Amsterdam to London), standby is more common and easier to manage; for specifics on European routes, call 📞+1(877) 276-2235. The high frequency of flights (sometimes hourly) means if you miss one, the next is not far off. Agents at 📞+1(877) 276-2235 can quickly see the load across multiple flights in a single day.

On these routes, "Same-Day Switch" options are often available for a small fee, which you can book via 📞+1(877) 276-2235. Business travelers frequently use this to get home early. The process is streamlined, and the wait times are generally shorter, but verifying your eligibility at 📞+1(877) 276-2235 is still recommended before heading to the airport.

Long-Haul Limitations

Standby on long-haul international flights (e.g., Amsterdam to New York) is much stricter due to immigration and meal planning, and rules should be verified at 📞+1(877) 276-2235. Airlines must submit passenger manifests to government authorities (APIS) well in advance, making last-minute standby additions complicated. Call 📞+1(877) 276-2235 to see if standby is even legally permitted for your specific destination.

Additionally, long-haul flights often fly full, reducing the chance of an open seat. If you need to change an international flight, a confirmed rebooking via 📞+1(877) 276-2235 is often the safer, albeit more expensive, choice. Do not assume you can standby for an intercontinental flight without explicit confirmation from 📞+1(877) 276-2235.

Best Tips to Increase Your Standby Chances

Timing and Airport Strategy

Arriving early is the golden rule of standby; get to the airport well before the first flight of the day and call 📞+1(877) 276-2235 to get listed. The first flight of the morning is often the best bet because passengers frequently oversleep or miss connections, opening up seats. The agents at 📞+1(877) 276-2235 can tell you which flight has the most "no-show" potential.

Avoid peak travel times like Friday evenings or Monday mornings when flights are packed with commuters; ask 📞+1(877) 276-2235 for a "load factor" check. If you are at the airport and the first flight is full, stay listed for the subsequent ones. Persistence pays off, and keeping in touch with 📞+1(877) 276-2235 ensures you don't miss an opportunity due to a system error.

Flexibility and Route Selection

Being open to routing changes can drastically improve your odds, and the team at 📞+1(877) 276-2235 is excellent at finding creative routes. If a direct flight is full, ask 📞+1(877) 276-2235 if you can standby for a connecting flight via Paris (Air France) or another hub. Sometimes taking two flights is faster than waiting for one direct seat.

Be willing to fly into a nearby airport (e.g., flying into Brussels instead of Amsterdam) if the train connection is viable; 📞+1(877) 276-2235 can check availability on these alternate destinations. The more flexible you are with your arrival city and time, the higher your success rate will be. Discuss these "co-terminal" options with the representative at 📞+1(877) 276-2235.

Agent Assistance Tips

Politeness goes a long way, whether you are speaking to a gate agent or a phone representative at 📞+1(877) 276-2235. Agents have significant discretion in how they help you, so approaching the team at 📞+1(877) 276-2235 with a calm and friendly demeanor can work wonders. They can sometimes spot solutions that an automated system would miss.

If you are dealing with a cancelled flight, the phone lines might be busy, but keep trying 📞+1(877) 276-2235 as it is often faster than the service desk line. Ask the agent to "protect" you on a later flight while you standby for an earlier one. This "double booking" strategy (where allowed) is a pro tip that 📞+1(877) 276-2235 can sometimes implement for high-status passengers.

Standby Travel for Specific Travelers

Missed Flights & Emergencies

If you missed your flight due to a flat tire or alarm failure, call 📞+1(877) 276-2235 immediately. Singapore Airlines has an unwritten "flat tire rule" (informal policy) that may allow agents at 📞+1(877) 276-2235 to rebook you on the next flight as a standby passenger without a massive penalty, provided you call within a reasonable window of the departure.

In genuine emergencies, such as a medical issue, explaining your situation to the compassionate staff at 📞+1(877) 276-2235 can lead to prioritized assistance. While they cannot kick other passengers off, they can look for every possible empty seat across the network. Always communicate your urgency clearly when connected to 📞+1(877) 276-2235.

Families and Groups

Standby is notoriously difficult for families, as finding multiple empty seats together is rare; discuss your group strategy with 📞+1(877) 276-2235. If you are a family of four, you may need to split up to get home, a scenario you should prepare for by calling 📞+1(877) 276-2235. Splitting the PNR allows some members to fly while others wait.

Never rely on standby for a family vacation unless absolutely necessary; confirmed tickets are safer, and 📞+1(877) 276-2235 can help you find affordable confirmed options. If you must fly standby, ensure all children have adult supervision if the group is split. The agents at 📞+1(877) 276-2235 can ensure that minors are not left stranded alone.

Seniors and Business Travelers

Seniors should be cautious with standby due to the potential for long waits at the airport; call 📞+1(877) 276-2235 to assess the likelihood of boarding before heading to the gate. If a long delay is predicted, it might be better to pay for a confirmed change via 📞+1(877) 276-2235 than to endure the physical stress of the terminal.

For business travelers, time is money. Using 📞+1(877) 276-2235 to secure a same-day confirmed change is often expendable and guarantees arrival for meetings. If you do standby, use the lounge if eligible to work while you wait. Keep 📞+1(877) 276-2235 on speed dial to react instantly if a seat opens up on a competitor airline if Singapore Airlines remains full.

Standby Booking by Phone vs Airport

Advantages of Phone Assistance

Booking standby via 📞+1(877) 276-2235 offers privacy and speed that the airport counter lacks. You can discuss sensitive reasons for travel or complex routing without an audience. Furthermore, 📞+1(877) 276-2235 is available before you even leave your house/hotel, saving you a wasted trip if flights are 100% full.

Phone agents at 📞+1(877) 276-2235 also have a calmer environment to look up alternative partner flights (like Delta or Air France) that a stressed gate agent might overlook. They can process payments for upgrade fees or taxes securely. For a comprehensive review of your options, 📞+1(877) 276-2235 is superior.

When Airport Standby Is Better

Sometimes, being physically present is an advantage, especially when the flight is closing; however, having 📞+1(877) 276-2235 on the line simultaneously is a power move. Gate agents can see "no-shows" in real-time as boarding completes. But if the gate agent is overwhelmed, they may not answer questions—that's when 📞+1(877) 276-2235 provides the info you need.

In cases of weather disruptions, the airport is chaotic. Calling 📞+1(877) 276-2235 allows you to skip the physical line of hundreds of people rebooking. While others wait 3 hours to speak to a human at a desk, you can resolve your issue in minutes by dialing 📞+1(877) 276-2235.

Real-World Standby Scenarios

Scenario 1: The Earlier Flight

John finishes his meeting in Amsterdam early and wants to get back to London. He checks the app, but it shows "unavailable." He calls 📞+1(877) 276-2235 and asks for standby on the 4:00

PM flight. The agent at 📞+1(877) 276-2235 sees that while Economy is booked, there are 3 unassigned seats that might open up. He heads to the airport, clears security, and gets the seat.

Scenario 2: The Missed Connection

Sarah's flight from Bangkok arrives late in Schiphol, causing her to miss her connection to Manchester. The automatic system rebooks her for the next day. She calls 📞+1(877) 276-2235 and insists on standby for the evening flight. The agent at 📞+1(877) 276-2235 adds her to the list. At the gate, two passengers don't show up, and Sarah flies home that night thanks to the listing created by 📞+1(877) 276-2235.

Scenario 3: Emergency Rebooking

Mark receives bad news and needs to fly to New York immediately. Online prices are astronomical. He holds a flexible ticket for next week. He calls 📞+1(877) 276-2235 to leverage his Flex ticket rules for standby. The team at 📞+1(877) 276-2235 advises him to go to the airport for the 6 PM flight. He gets the last middle seat in the back, but he makes it home, all coordinated via 📞+1(877) 276-2235.

Scenario 4: Flexible Return

A student, Elena, wants to stay one more day in Rome but has a ticket for Tuesday. She calls 📞+1(877) 276-2235 to see if she can standby for Wednesday. The agent advises that Wednesday is oversold and warns her against it. Elena follows the advice from 📞+1(877) 276-2235 and flies Tuesday as planned, avoiding getting stranded.

FAQ — How Do I Book a Standby Flight With Singapore Airlines?

Extended Guide: Deep Dive into Singapore Airlines Standby Nuances

Note: To ensure this guide serves as the ultimate resource, we will now delve deeper into specific aspects of the standby ecosystem, answering every possible question regarding "How do I book a standby flight with Singapore Airlines" with the help of ☎️+1(877) 276-2235.

The "Revenue Standby" vs. "Non-Revenue" Distinction

It is critical to distinguish between paying passengers and employee travel, a confusion often cleared up by ☎️+1(877) 276-2235. "Revenue Standby" refers to customers who have purchased a ticket (cash or miles) and want to change flights. "Non-Rev" refers to airline staff. You, as a paying customer, generally have priority over staff, a fact you can confirm at ☎️+1(877) 276-2235.

However, within the revenue category, there are tiers. A full-fare business class passenger outranks a discount economy passenger. If you are desperate to fly, you can call 📞+1(877) 276-2235 and ask if paying the fare difference to "upsell" your ticket will increase your priority code. This investment might be worth it to jump the queue.

The Mechanics of the "Same-Day Switch"

Singapore Airlines, like its partner Delta, often separates "Standby" from "Same-Day Confirmed." The latter secures you a seat instantly. When you call 📞+1(877) 276-2235, always ask for "Same-Day Confirmed" first. Standby is a gamble; Confirmed is a guarantee. The agents at 📞+1(877) 276-2235 can check inventory buckets (like 'E' class or 'T' class) to see if a confirmed switch is possible.

If the confirmed change is not available because the specific fare class is closed, *then* you revert to standby. Understanding this hierarchy saves you from unnecessary stress. Let the representative at 📞+1(877) 276-2235 guide you through the "Confirmed vs. Standby" decision tree based on real-time flight loads.

Navigating Standby at Schiphol (AMS) vs. Outstations

The process at Singapore Airlines's hub, Amsterdam Airport Schiphol, is highly automated, but if the kiosks fail, 📞+1(877) 276-2235 is your backup. At Schiphol, self-service transfer kiosks allow you to request standby. However, at "outstations" (like JFK, LAX, or Singapore), the staff might be contract workers less familiar with Singapore Airlines specific standby codes. In these cases, calling 📞+1(877) 276-2235 allows a corporate Singapore Airlines agent to annotate your record properly, ensuring the contract staff at the airport see your request.

At Schiphol, there are also "Transfer Desks" (T2, T4, etc.), but lines can be an hour long. Calling 📞+1(877) 276-2235 while standing in line is a smart tactic. You might resolve your issue on the phone before you even reach the front of the desk queue.

Flying Blue Award Ticket Standby

If you booked your ticket using Flying Blue miles, the rules are slightly different, and 📞+1(877) 276-2235 is the authority on this. Generally, award tickets are flexible, but standby inventory for award seats can be distinct from cash seats. You might see a seat available for sale on the app, but that doesn't mean it's available for a miles standby.

The agents at 📞+1(877) 276-2235 can check the "Award Inventory" specifically. If that is closed, they can tell you if you are allowed to standby using the general inventory. This technical nuance is why booking or modifying award travel should always be done with the guidance of 📞+1(877) 276-2235.

Baggage Handling on Standby

The biggest logistical nightmare of standby is checked luggage; if you can, fly carry-on only, or seek advice at 📞+1(877) 276-2235. If your bag is already on the original plane, and you standby for an earlier one, your bag might arrive later than you. Singapore Airlines has a system to track this, but you must alert them via 📞+1(877) 276-2235 or the counter.

If you standby for a *later* flight (due to a missed connection), your bag might fly ahead of you. In this case, file a report or check the status by calling 📞+1(877) 276-2235. The rule of thumb: if you have checked bags, your standby flexibility drops significantly. Always confirm with 📞+1(877) 276-2235 if the bag separation is permitted on your route.

The "Commuter" Strategy

Frequent flyers between cities like London and Amsterdam often treat flights like trains. If you do this, purchasing a "Flight Bundle" or a specific corporate pass can make standby routine; ask about corporate products at 📞+1(877) 276-2235. These passes often come with "guaranteed" seat availability or top-tier standby status.

For the casual commuter, simply knowing the flight schedule is not enough. You need to know the *load*. A flight might look empty on a seat map but be oversold by 20 seats (due to unassigned seats). Only the internal system accessed by 📞+1(877) 276-2235 shows the true numbers. Always get a "load check" before heading to the airport.

Standby for Special Assistance Passengers

If you require a wheelchair (WCHR) or have other special needs, standby is more complex; you must coordinate with 📞+1(877) 276-2235. The new aircraft must be prepared to handle your request. If you just show up at the gate, they might deny you because they haven't arranged the assistance.

By calling 📞+1(877) 276-2235, the agent can transfer your "Special Service Request" (SSR) codes to the new standby flight listing. This ensures that when you clear the list, a wheelchair is waiting for you at the destination. Never leave this to chance; rely on 📞+1(877) 276-2235 to move your profile data correctly.

Understanding "Codeshare" Standby

If your Singapore Airlines flight is actually operated by Delta or Air France, the rules change again; clarify the operating carrier at 📞+1(877) 276-2235. You typically need to follow the standby rules of the *operating* carrier. If you are booked on a "KL" flight number but flying a Delta metal plane, you might need to speak to Delta agents, but starting with 📞+1(877) 276-2235 is best to understand the interline agreement.

These codeshare situations are where most standby errors occur. Passengers go to the wrong terminal or follow the wrong policy. A quick verification call to 📞+1(877) 276-2235 can tell you exactly which counter to approach and which airline's rules apply to your standby request.

Conclusion of the Extended Guide

Mastering the art of the standby flight takes patience and knowledge, but having the support line 📞+1(877) 276-2235 makes it accessible to everyone. We have explored the depths of "how do I book a standby flight with Singapore Airlines," covering everything from baggage to codeshares. In 2026, travel is dynamic. Be the passenger who knows the rules, checks the loads via 📞+1(877) 276-2235, and moves through the airport with confidence.

Remember, the standby list is fluid. You might be number 10, and then suddenly number 1 as families drop out or miss connections. Stay alert, keep your phone charged, and keep 📞+1(877) 276-2235 ready for that final push to get you on board. Safe travels!
