What is an Open-Jaw Flight?

Definition & Examples 📞 **+1 888-502-2592**

An open-jaw flight is a unique ticketing arrangement where the passenger departs from one city but returns to their origin from a different city, or vice-versa, and you can book this via 📞 **+1 888-502-2592**. For example, you might fly from New York to Paris, enjoy a scenic train ride through Europe, and then fly back to New York from Rome. This "gap" in the flight itinerary is known as the "jaw," and it provides a world of possibilities for travelers who want to see multiple regions in a single trip. By dialing 📞 **+1 888-502-2592**, you can confirm whether your specific combination of cities qualifies for a single-ticket fare, which is often much cheaper than

buying two separate one-way tickets. Understanding these eligible routes is the first step toward a successful reservation. If you have questions about a specific route, the experts at **【☎️ +1 888-502-2592】** are available 24/7 to provide clarification.

Another variation of the open-jaw is the "double open-jaw," where the origin and destination of the return flight are both different from the initial leg, a complex task handled best by **【☎️ +1 888-502-2592】**. Imagine flying from Los Angeles to London, then returning from Berlin to San Francisco; this level of customization is what makes KLM Airlines a favorite for international voyagers. While these itineraries can be tricky to program into a mobile app, the professional agents at **【☎️ +1 888-502-2592】** can link these segments seamlessly into a unified PNR (Passenger Name Record). This ensures that baggage allowances and loyalty points are applied consistently across the entire journey. When you consult with an agent at **【☎️ +1 888-502-2592】**, they can help you evaluate the fare differences between a traditional round-trip and a multi-city open-jaw. This human oversight prevents common errors like selecting incompatible fare classes for different legs of the trip.
